Continuing Irish political education following last month's discussion:

The 34th Dáil, the lower house of Ireland's bicameral legislature, is composed of 174 seats, Its representatives, known as Teachta Dála, i.e., Dáil Deputy, are commonly referred to as TDs. The number of TDs equates to between 20,000 to 30,000 of the population. In the last election, they were elected in 39 constituencies, each having between three to five TDs. Proportional representation is achieved by means of single transferable votes, which we would call ranked-choice balloting. Votes are transferred according to alternative preferences as the voter's preferred candidate is eliminated or elected with surplus votes. For example, during the 2024 election the Cavan-Monaghan constituency, which has five seats, was contested by 20 candidates. It took until the 10th count, that is redistribution of votes, before the first candidate had enough votes to be elected, and the 4th and 5th seats were elected on the 14th count. Two of these TDs belong to Fianna Fáil, the Soldiers of Destiny; two belong to Sinn Féin, [We] Ourselves; and one Fine Gael, the Family of the Irish.

Team Ireland for the 2026 Winter Olympics: Ben Lynch, Cormac Comerford, Anabelle Zurbay, and Thomas Maloney Westgård. Team Ireland

Four athletes will be representing Team Ireland at the Milano Cortina 2026 Olympic Winter Games.

Anabelle Zurbay, Cormac Comerford, and Ben Lynch are making their first Olympic appearance, while Thomas Maloney Westgård is becoming Ireland's second-ever three-time Winter Olympian at this year's games in Italy.

The four athletes representing Ireland will be competing across Alpine Skiing, Freestyle Skiing, and Cross-Country Skiing in multiple competition clusters across northern Italy.

Ireland made its Winter Olympics debut in 1992, and by the end of the 2026 Games, 36 athletes will have competed for Team Ireland across nine Winter Olympic Games. Ireland has yet to win a medal at a Winter Olympics, with its highest finish being Clifton Wrottesley, who came fourth in the Skeleton in 2002.

The Icy Threshold: The Tragic Wrecks of the *Bristol* and the *Mexico*

Contributed by Brian P. Hegarty Jr.

The dream of a better life in America has often been paid for in blood, but few chapters in maritime history are as chilling as the winter of 1836–1837. Within a span of six weeks, two vessels—the *Bristol* and the *Mexico*—were claimed by the unforgiving shoals of Long Island. Carrying 215 souls, mostly Irish immigrants seeking refuge from hardship, these ships became monuments to both human suffering and the systemic failures of the era. Their destruction was not merely a result of bad weather, but a collision of class disparity, corporate monopoly, and a desperate search for a new beginning.

The *Bristol* met its end on November 21, 1836, after a relatively efficient 35-day crossing from Liverpool. Carrying a mix of coal, iron, and a more prosperous class of passengers—including doctors and tradesmen—the ship represented the "respectable" face of immigration. Even so, the Atlantic was an equal-opportunity destroyer. While waiting for a harbor pilot to navigate the treacherous entrance to New York Harbor, the *Bristol* ran aground on the Rockaway shoals. The end was sudden: a "tremendous" wave swept the decks clean, splintering the vessel and flooding the lower decks. In a final act of maritime chivalry, the captain prioritized the lives of women and children, remaining on the ship until the last possible moment. Nevertheless, 100 passengers perished in the surf.

If the *Bristol* was a sudden tragedy, the wreck of the *Mexico* on January 2, 1837, was a prolonged horror. The *Mexico* was a "leaky boat," dangerously overloaded with farm laborers who could only afford the cheapest, latest passage of the season. Their journey lasted a grueling 71 days, during which the passengers lived in jerry-rigged cubicles and faced starvation after food supplies vanished ten days before reaching land.

The *Mexico* reached Long Island only to find the same lack of pilot assistance that doomed the *Bristol*. Stuck on a sandbar just 200 yards from shore, the ship became a literal icebox. With temperatures hovering at zero degrees, the spray from the "house-high" waves instantly encased the ship and its passengers in a thick layer of ice. Witnesses on shore could hear the screams of the dying, but the surf was too violent for rescue. While a local man named Raynor Smith heroically saved eight people, the *Mexico*'s captain, Charles Winslow, chose a different path; he abandoned his passengers to save himself, his sword, and his lockbox. When rescuers finally reached the ship, they found a scene beyond description: families "congealed together in one frozen mass," including a couple locked in an embrace so tight they had to be buried in a single coffin.

The aftermath of these wrecks rippled through American society, prompting immediate and lasting changes. The public was outraged by the monopoly held by New York pilots, which was blamed for the ships' inability to enter the harbor safely. Consequently, the monopoly was broken, allowing New Jersey pilots to compete for business. Furthermore, the disaster compelled Congress to mandate that coastal patrol boats incorporate rescue operations into their mission—a vital step toward the eventual creation of the U.S. Coast Guard.

The cultural memory of the *Bristol* and the *Mexico* has persisted through the centuries. Long Island's own Walt Whitman immortalized the tragedies in his 1855 masterpiece, *Leaves of Grass*. Decades later, a young Cornell

student named Ruth Bader Ginsburg—long before she would take her seat on the Supreme Court—documented the history of the victims' monument for the *New York Folklore Quarterly*.

Today, an 18-foot marble obelisk stands in Rockville Cemetery, marking the mass grave of those 215 immigrants and a local AOH chapter has an annual commemoration considering it sacred ground. Unlike the *Titanic*, these victims were not millionaires; they were laborers and families whose lives were cut short just yards from the promise of a new world. Their story remains a somber reminder of the staggering cost of the immigrant journey and the icy threshold many had to cross in their pursuit of the American dream.
